

Kirloskar Remote Monitoring System :

Your Generator now comes with complete remote monitoring control. Being in control of your own Generator is certainly a winning edge!

The KRM system links your Generator with a central monitoring data server through a SIM and internet. The complete monitoring panel with all critical indicators can be viewed on your laptop screen or mobile. You also get all alarms on your mobile phone.

Critical Parameters: Generator Run hrs, Fuel level, Engine oil pressure, Engine temperature, Engine speed (RPM), voltage/ current/ kW, battery monitoring, PF & Frequency, routine maintenance indicator
Critical Alarms: Low fuel level, low lub oil pressure, fuel theft, Engine speed, High Engine temperature, Mains On/ Off, Low/ High battery voltage.

Advantages of KRM system: Your Generator will be used most efficiently as it's health meter will always be available at your finger-tips. Being a 'remote control' this health monitoring can be done from wherever you are. This close monitoring also helps in reducing your operating costs and enhancing reliability of the Generator you own. So in all, you have better return on your investment and enhanced productivity by maximum uptime.
